Changing the Chlor-Alkali- Industry

ConveAVS-Vega Mesa, LLC signs a Sales Representative Agreement with ClearWater Technologies

Miami, Florida March 6, 2009 – ConveAVS-Vega Mesa, LLC (CAVM) a Supplier of Chlor-Alkali and sodium hypochlorite skid mounted plants including hydrochloric acid production systems and caustic soda evaporation units announces the signing of a sales and marketing agreement with ClearWater Technologies.

ClearWater Technologies a subsidiary of Industrial Control Systems in Sandston, VA will promote the CAVM Chlor-Alkali plants in the US municipal market where the demand has grown in recent years with the replacement of liquid chlorine tank cars and cylinders.

Alberto Gonzalez, Director for CAVM in Miami, commented, “ClearWater Technologies has the experience in the municipal market with major engineering firms and owners to assist us in the application of our technology for the rising demand of on-site hypo generation.

Mark Romers, President of ICS/CWT commented, “ClearWater Technologies has assembled a group of companies that are leaders in their technology applications for water and wastewater. We consider CAVM an important part of this group and look forward to a long and mutually beneficial relationship.
