

OBL America signs representative agreement with ClearWater Technologies

Atlanta, GA March 9, 2009– OBL a manufacturer of metering pumps for municipal and industrial applications has signed a representative agreement with ClearWater Technologies with emphasis on the municipal market.

ClearWater Technologies a subsidiary of Industrial Control Systems in Sandston, VA will promote the OBL line of metering pumps that include mechanical diaphragm, plunger, hydraulic diaphragm and API hydraulic diaphragm models.

Tim Mann, President OBL America, commented, “The addition of ClearWater Technologies to our representative group in the US municipal market allows us to build on the momentum created by the innovative technology of OBL metering pumps.”

Mark Romers, President of ICS/CWT commented, “OBL metering pumps are a vital part of our sales and marketing strategy for ClearWater Technologies as we continue put together the packaged equipment systems for water and wastewater treatment.
